

Table S1. Predictor variable summary. Summary statistics of predictor variables used in Cox proportional hazards model development.

Variable	Mean	Standard Deviation
a) Habitat Variables		
Host Basal Area/Acre	14.50	4.92
Host Trees per Acre	31.84	10.07
Estimated Number of Host Trees	614.84	598.03
Tree of Heaven Observation Count	44.61	300.74
Forested Land (Acres)	17.57	16.61
Canopy Cover (%)	45.38	19.74
b) Anthropogenic Variables		
Human Population (2000)	151207	279291
Road Density	29.97	37.20
